PROFILE

Computer Network Engineering student with hands-on experience in full-stack web and Android development, secure network design, and machine learning. Built e-government and SaaS applications with Next.js, TypeScript, and Supabase, deployed on Vercel and self-managed Linux VMs, and published an app on Google Play. Passionate about AI, developer tools, and community building.

EDUCATION

Politeknik Negeri Lhokseumawe Lhokseumawe, Aceh
D-IV Computer Network Engineering Technology (TRKJ) 5th Semester | Expected Spring 2028

PROJECT EXPERIENCE

E-Government & Network Security

KMIPN 2026 (National Polytechnic Informatics Student Competition): Siskamling App June 2026

- Represented the university in the e-government category of the national competition.
- Developed a community neighborhood-watch (Siskamling) application with separate frontend and backend, collaborating with a team under competitive deadlines.

TRIASE-Net: Secure Student Complaint Service

- Designed a secure communication system for student complaint services using Zero Trust Network Access (ZTNA) and adaptive encryption.
- Technologies: Next.js, TypeScript, Vitest, ESLint.

Web Development

SnapNext: SaaS Photo Booth Platform photobox-saas-main-ews1.vercel.app

- Built a browser-based photo booth platform with user authentication, subscription packages with session quotas, and personal photo galleries.
- Technologies: Next.js 15, TypeScript, Supabase (PostgreSQL, Auth, Storage), Tailwind CSS, Vercel.

Regal Stay: Luxury Hotel Website regal-stay.vercel.app

- Built a responsive hotel website with a Node.js (Express) REST API hosted on a Debian 13 virtual machine and a frontend deployed on Vercel.
- Technologies: HTML, CSS, JavaScript, Node.js, Express, Vercel, Debian Linux.

Other Web Projects

- Academic Management System: web application with separate frontend and backend, with documented database design.
- Brownies App: full-stack web application built with Next.js, TypeScript, and Prisma ORM.

Mobile Development

Suara Digital Desa: Android Village Services App play.google.com/store/apps/details?id=com.suaradigitaldesa

- Developed and published on Google Play an Android app for village digital services: announcements, citizen reports with photo attachments, report status tracking, community news, and emergency contacts.

AI & Machine Learning

AI & Machine Learning Development Projects 2025 – Present

- Completed specialized Machine Learning & Python coursework on the Dicoding platform.
- Explored LLM integration and prompt engineering using AI coding tools (GitHub Copilot, Claude API).

CERTIFICATIONS & TRAINING

- AWS AI Academy (2026); Machine Learning & Python Specialization, Dicoding Indonesia

SKILLS

- **Programming Language:** Python, Java, JavaScript, TypeScript, SQL, HTML/CSS
- **AI & Tools:** Machine Learning, Prompt Engineering, LLM Integration, GitHub Copilot, Claude API
- **Web, Mobile & Cloud:** Next.js, Node.js, Express, REST API, Tailwind CSS, Android App Development, Vercel
- **Database & Tools:** PostgreSQL, Prisma ORM, Supabase, GitHub, GitHub Codespaces
- **Networking & Systems:** Computer Networking, Linux Administration, Zero Trust (ZTNA), Technical Documentation
- **Soft Skills:** Leadership, public speaking, community engagement, event organizing, teamwork
